ITEM 9 - APPROVAL OF CHANGE ORDER NO. 2 OF KAMAN AUTOMATION, CONTROL & ENERGY FOR CONTRACT NO. EMA-03A, DISTRIBUTION SCADA REPLACEMENT, PROJECT NO. 201400160, CONTRACT NO. 16-16-07 - \$101,013.00

Motion by Mr. Simmeth seconded by Mr. Schad

WHEREAS, Heretofore and on the 23rd day of June, 2016, the Erie County Water Authority ("Authority") entered into a contract with Kaman Automation, Control & Energy for Contract No. EMA-03A, Distribution SCADA Replacement, identified as Contract No. 16-16-07; and

WHEREAS, Said contractor has submitted Change Order No. 2 in the sum of \$101,013.00 to provide for the following changes:

1. A 280-day time extension to the Substantial Completion and 334-day time extension to the Final Completion dates
2. Additional efforts were required to develop and test the radio communication system because radios were not setup by ECWA during the Factory Acceptance Testing
3. ECWA requested that the pump interlocks to reduce system pressure when a secondary station was started against the primary station
4. ECWA requested that the operation of the constant speed pumps be revised to operate differently than originally designed
5. ECWA requested that the operation of the VFD pumps be revised to operate differently than originally designed
6. ECWA requested that several sites have additional Chlorine monitoring as well as some sites have additional Fluoride monitoring
7. ECWA requested that additional interlocks to shutdown pumps and interlock pumps be added to the system to increase the optimization of the operation of the system
8. With the additional items being added to the programming, there will be additional Site Acceptance Testing required at the eight sites that have been transitioned to date
9. ECWA requested that Ball pumps be fully automated based on system demand, which was not part of original design
10. ECWA requested an additional allowance be added to cover any unforeseen issues with the transition of stations. These funds are only available to the contractor upon EMA and ECWA approval; and

WHEREAS, The reasons for the above changes are as follows:

1. The Contractor is requesting a 280-day time extension to the Substantial Completion and 334-day time extension to the Final Completion dates due to a) a change directive to the contractor. The information from ECWA was formulated over a longer period than expected and additional items were added during the process of

developing the change and b) as the radio system was not made available for testing the system during the FAT, this has caused difficulties during the implantation of the system over the radio network. Additional investigation was required to determine the settings for communication optimization.

2. During the Factory Acceptance Testing, ECWA did not set up the radios and connect them to the test system to ensure the operation of the stations on the radio network with the SCADA programming. This has caused issues in the live system that required additional testing and reconfiguration.
3. During operation of the new SCADA system, operations requested changes to the programming to enhance the operation to add more functionality to the system that was never previously discussed by operations. These features include interlocks between pump stations, revision of the operation of constant speed pumps versus VFD speed pumps and the revised operation of VFD speed pumps.
4. Additional programming was required for additional Chlorine and Fluoride monitoring at several stations. These stations include Veterans Park, Colvin, Ball, Windom and Aurora.
5. Additional items were also added for shutdown interlocks, access levels to setpoints, changes to level, pressure and flow operation, removal of devices from the program and updates to the PCN and drawings.
6. With the new operational changes this will require additional testing at the stations previously transitioned.
7. The operation at Ball pump station was also revised and includes more automation to have the system select the pumps by demand.
8. Additional allowance is being carried as a contingency to cover unforeseen work or issues; and

WHEREAS, Russell J. Stoll, Executive Engineer and Michael Haendiges, Production Engineer recommend approval of said Change Order No. 2;

NOW, THEREFORE, BE IT RESOLVED:

That Change Order No. 2 of Kaman Automation, Control & Energy in the amount of \$101,013.00 to provide for the abovementioned change be approved; and be it further

RESOLVED: That the Chairman is hereby authorized to execute said Change Order No. 2 on behalf of the Authority.
